

Feature Name: Friend Prompt**Problem:**

Users have limited opportunities to initiate additional BeReals with friends outside the recurring daily posting routine.

Target User:

Users who already use BeReal with their friends and want more opportunities to share moments with them.

Success Metric:

Primary: Percentage of users who post additional BeReals through a friend's prompt.

Secondary: Percentage of users sending at least one prompt within a time period, percentage of prompts that result in a response, average active days per user per week.

Assumptions & Non-Goals:

Assumptions:

Users understand how to use Friend Prompt and are willing to initiate prompts.

Users want to receive prompts from friends

Users will respond to prompts from friends.

Friend prompts feel optional and do not create pressure.

Non-Goals:

Gamified system that turns prompts into a competition or obligation.

Building a back-and-forth BeReal exchange system.

Building a real-time messaging or chat.

Replacement of the daily posting notification.

User Story:

As a user, I want to send personalised prompts to my friends so that I can initiate a shared moment with them.

As a user, I want to respond to prompts from friends so that I have a personal reason to create and share a BeReal.

As a user, I want to view my friends' BeReals in response to the same prompt so that I feel more connected to my friends through the shared experience.

Acceptance Criteria:

Users can create and send personalised prompts to selected friends.

Recipients can respond to prompts by creating and sharing BeReals.

Users can view the BeReals from friends created in response to the same prompt.

Users can receive prompts without being required to respond.

Friend Prompts can be turned off anytime.

Guardrails:

Prompts encourage genuine, unfiltered sharing among friends. Users can ignore prompts and opt out of receiving Friend Prompts. Sending and responding are quick, simple and lightweight. Prompts encourage personal interaction between friends, not competition or comparison.
